## Message from your Chapter President

Fellow ASHRAE Members,

In January, I had the privilege of attending the ASHRAE convention in Orlando and saw many Evansville ASHRAE members as well as numerous innovative products. A couple such products to receive a lot of attention in the last several years has been the use of PV and vegetated roofing systems; both of which are the topic of this month's joint meeting with CSI and USGBC. It should be an excellent opportunity to learn more about these exciting technologies. I hope to see you there!

Respectfully,  
Keith Cecil, P.E.  
Evansville Chapter President.

### Free Energy Guidance

To promote building energy efficiency, ASHRAE and its partners are making the Advanced Energy Design Guides available for free download (PDF). The guides offer designers and contractors the tools needed for achieving a 30% energy savings compared to buildings that meet the minimum requirements of Standard 90.1-1999. **Energy guidance focused on highway lodging is now available!**

## Build your credentials with ASHRAE

Have you considered getting certified as a Healthcare Facility Design Professional or a High-Performance Building Design Professional? Maybe you and your clients would benefit from a certified Operations & Performance or Commissioning Process Management Professional. If so, then you need to check out ASHRAE's certification programs at <http://www.ashrae.org/certification/>.

ASHRAE's certification programs are developed by industry practitioners who understand the knowledge and experience that are expected for superior building design and system operation. Earning an ASHRAE certification assures employers and clients that the certificant has mastered the body of knowledge associated with the respective field. An ASHRAE certification also serves as a springboard for continued professional development.

## February Technical Presentation – Sustainable Roof Design

This month the Evansville Chapter of ASHRAE will be joining many of our colleagues in a meeting and discussion of sustainable roof design. Please join us, along with CSI, USGBC, AIA, ICA and IFMA,

The presentation this month will be focused on sustainable roof design. We will have two different speakers, Mr. Owen Slaughter and Mr. Brad Morton. Mr. Slaughter is with LiveRoof and he will discuss Vegetated Roofing systems, with the inclusion of information on water runoff and energy savings. Mr. Morton will present the Solar PV roofing option, including installation guidelines, cost estimates and economic payback.

This presentation should be very interesting and relevant to your client's needs and wants. This information presented should give everyone the background to address questions on the value and "green" aspect of the systems.
