Date: Tuesday, May 11, 2010 **Time:** 11:30 – Social/Lunch **Price:** FREE - Members
Where: RiRa's Irish Pub 12:00 – Presentation \$20.00 – Non-Member
 Downtown, Evansville

Message from your Chapter President

Fellow ASHRAE Members,

Last month's meeting regarding the International Code Council's and ASHRAE's Standard 189.1 was an interesting meeting. For those seeking guidelines on designing energy efficient, high-performance building systems, this may be a useful guide. A special thanks to SMACNA for sharing their meeting with us.

The state of Indiana is adopting a new Energy Conservation Code and retiring its use of the Model Energy Code. The code will be based upon ASHRAE 90.1. This month's speaker has been a longstanding member the 90.1 committee and should an informative presentation on the Standard. I hope you'll be able to attend.

This month's meeting also marks the last meeting until fall. Don Werner, our president-elect will assume leadership of the chapter. It's been a pleasure representing the chapter this year. I've gained an appreciation of all of the work that it takes to keep ASHRAE successful. There's many people involved putting forth the newsletter, finding and arranging the speakers for each meeting, putting together the golf scramble (don't forget it's coming up this summer...more to come on this later), and all of the other activities. I would like to thank all of you who put forth effort to keep the Evansville ASHRAE Chapter vibrant. Actively participating in the Chapter is not only a way to give back to an organization that gives us so much, but it enriches us. If you'd like to actively participate next year or any of the following years, let me know.

Respectfully,
 Keith Cecil, P.E.
 Evansville Chapter President.

Free Energy Guidance

To promote building energy efficiency, ASHRAE and its partners are making the Advanced Energy Design Guides available for free download (PDF). The guides offer designers and contractors the tools needed for achieving a 30% energy savings compared to buildings that meet the minimum requirements of Standard 90.1-1999. **Energy guidance focused on highway lodging is now available!** [Learn more...](#)

The GREEN Standard: Standard 189.1 – Standard for the Design of High-Performance, Green Buildings

ANSI/ASHRAE/USGBC/IES Standard 189.1, *Standard for the Design of High-Performance, Green Buildings Except Low-Rise Residential Buildings*, is the first code-intended commercial green building standard in the United States. It provides a long-needed green building foundation for those who strive to design, build and operate green buildings. The standard covers key topic areas of site sustainability, water use efficiency, energy efficiency, indoor environmental quality and the building's impact on the atmosphere, materials and resources, and also includes construction practices as well as plans for operation of the building after occupancy.

May Presentation – Are You Ready for the NEW Indiana Energy Code? – ASHRAE 90.1-2007

This month, the Evansville ASHRAE Chapter welcomes Mr. Jerry W. White, P.E. Mr. White has been a member of the ASHRAE 90.1 committee for over 19 years. He was chair of the Committee for 5 years along with the Lighting and Power subcommittee chair. Mr. White is also member of the ASHRAE ISO/TC 205 committee which is the USA representatives to the World International Energy Code Standards which develops the ISO Energy codes for other countries through out the world. He has been the President of the Illuminating Engineering Society of North America. He led or was part of 3 delegations of professional lighting designers and illumination scientist as representatives of our government to the governments of China and Russia to conduct educational seminars. Mr. White has been a consulting engineer for over 40 years with projects in 36 states and internationally.
